So you just push the A class, bogged down a lot of people's side, and Pearson has not just the IT class. Hey, simulation. The simulation allows you to spend, practice, the skills that you need to do whatever happens, a faster, a greater project. That's what you'd be great enough, actually, when you finish it. Submit it to Pearson, within about a minute, it would be great. Okay? You actually have three attempts at the, um, greater body, get it correct. And the reason for that, well, I'm sorry, the reason for another step that we have to do, actually, then sticks, okay? Because I want you to save the work that you do in a greater project, so you stick. Because if you get Smith, a Pearson, it doesn't give you a blue enough grade, you have two or attempts to do it. But if you submit it to piercing right away, in order to get use of those other two attempts, you're gonna start from the beginning all over. So you say with your stick, it says, Oh, you got question four wrong? Question seven, wrong, question nine. You can go back to your stick, make the corrections that they tell you to do, and then submit it to your grade should go up, okay? I've been in mind. I do it this way. And save a lot of time. Whereas if you submit the piercing, right after doing it the first time, and you miss a couple of questions, they will let you go back the next two times, but you start the beginning of the day. That's kind of crazy. All right, so, let's take a look at this. Hopefully, this will start to grow a little bit. I think a look at the 2 different things look like. Thank you. And you're going to get, this is your my lab, this goes back to the other courses in there. You have assignments there, results of the assignments, okay? you can see what how you're doing. I have a few extra things in here. I an instruction instructctor tool I take over here. There's two ways to look at your assignments, okay? I kind of like this, what they call list, all right? We'll see that on the list. See all the assignments we're going to do for this new, and broken them down my chap. There's one, two, three, four, one, get to, uh, chat. I have a couple of chapters I speak in here. only because of the information in there and the things they want you to do were way beyond it for everybody who's in the spreadsheets. Right? So you can also look over here, and this is a calendar view, but the calendar view only shows you the due dates. I went to due dates in here from other side. Okay, but I will. So living with the cal CS that's when they do. Usually a sign at one black before. sometimes to tell what we're doing that So I'll go back to the... All right. Again, 2 different things. Simulations and greater projects. Let's take a look at what a simulated website. Okay? Comes up like this. This is the Sims. Okay, the attachment. You know, attractive, but still enough, I mean, that's just really, okay, you'll see one page check. Okay. The only launch The whole thing. All right. You're gonna see a spreadsheet, you'll have to work on. and we're going see some instructions then I bottom here. Tell me what to do. If you have a smaller school where you're using a laptop with a smaller screen, you may not see the instructions of the bottom, you see them on the right inside. Okay? Anytime you see instructions that are in blue, it has to be typed in exactly the way they show it to you. Even if it's wrong, even if they get the wrong spellings, then, because they're wrong. So, yeah, anything that blue, you start expecting exactly what you want. Anything is not glue, you can type it in almost any way you want. Okay? So, let's look at this. It says, here, type souvenir program, sell it. Yourself, uh, hey, hey, hey. thank you. All right? I'm gonna type that in. And I'm the worst typist you'll ever see. Never learned, I've never had a typing class in my whole life. Growing up, we had to do a penguin. And that's, that's coming back now. So this is, uh, as... you... And then I go to the next question, question with you. soundtrack TV in A9 I was. Can you learn something about spreadsheets? when you get an? That was, you know, things off to right, you know, he was down. Right? So this is type souvenirs, uh, or soundtrack to CD, who makes that? So let's

see this. Okay. Now I says, select cell A1, and you spell check on the working. By the top here. A one. Because I'm selling error in there, right? And, um, We, um, It's like day walking in, checks the spelling out, which is, we walk here to, um, Review. We're going to selling it. Okay? says, hey. I'm gonna be action. I said, do you not actually what you want to do? What we're doing wrong? Okay? So what's nice about the simulations, and it helps. So you come over here, where is his learning AIDS, and put on that. It has 3 ways to try to find an idea. Okay? And the 1st is you can go and read the book online, and you don't have a physical book. The book is there online. And we take you to the right place in the right chapter, like paragraph one of us, can I do that? And you can watch a video. Or I think it's practicing, especially in India's class, make a practice as well. This is what I thought you would do. Press control, Press. And then click the review town. Okay. So they wanted me to do the thing, they wanted me to do a certain way here. They wanted me to control key, and the home key, to bring it up to an A1. So, what it up there? okay? What coffee is it? What do you spell it, I think? a souvenir. Then it says book to review. I want you to review 1st because that's really... I didn't want it to do a different way. They're not issues. So, right. So we checked the spelling over here. Okay? And the spelling dialogue box, under suggestions, with the word souvenir selected, click the change button. Sure. Click, okay. See, it can make the change, okay? All right. So expelled it properly, and that, that practice is over, okay? And then it says, then once their practice is over, they want you to do it. Okay? What's that? I'm kind of, like, I wasn't able to enter. Oh, but... I'm not doing it here. I haven't open that program with you. I'm just showing you what it's good like. It's not open okay? Yeah. All right, so that's the simulation, right? So now that it shows you how to do that, you're learning it, they don't watch you do it. okay? And see, we already made 2 attempts at this question, you know, five attempts, and then you just see my profession before I move the line. Now, once you finish all of the questions, or let's say you only did half, there's 22 questions in the 1st simulation. You can submit it. I mean, to save it rather, and then it will save it, pierce it. Okay? And then when you go back to it, let's see, you go back into dull armor, you go back home, you know, after you saved it to Pearson, and, um, I'll do this. I'll save that. And he says, you know, you want to save this because you haven't finished it. And I say, okay, I'll save it. All right? And then when I come back to it later on, He takes me back here, okay? Actually, further in has to be last question we have. All right? I mean, here's, you don't want to submit it to here's something if you do, then it's going to give you a grade, okay? And that's the reason I ask you to bring in a stick. Because I want you to save the things that stick so that we'll back to the stick and make many directions. You're gonna do, okay? All right, that's the simulation, all right? And again, um... How old is could you get? We're going to do this anyway, probably Monday. right? So now let's look at the other part of this, which is really made a little program here. So Okay. So within each chapter, we're gonna be doing minimum, probably 12, I should say, anywhere between one to three greater budgets. And at first... for chapters, that's where the meat of this program is. We're doing a lot of stuff in the 1st 4 chapters. So we get yesterday, more dance chapters, we're going to be doing it on just one major project. All right, so use chapter one, data project. Show the difference. Maybe different screen. Now this, we'll give you the instructions. And if you're really quick at doing this, the instructions, and you can do the spreadsheet at the same time, because you can split the screen and go back. I'm too old to do that, okay? I like to print it out, have it, and I'll have it, or you said, I know I have the instructions in front of me. I don't want to do it. The other thing you can do is download all the materials. Music materials for

almost all the way in your projects. You have instructions, you have the spreadsheet, and in most cases, there's only a couple instances you don't have this. You have the end results. So I download this. Take a look at an idea what to look like when I'm finished. That's the end results that they're looking for. okay? She looks just like that, these numbers in and everything else. You can't submit that compared to Pierce. They know that that's something that they did, okay? Look, this will give you an idea, if after you finish, the instructions in your class. So your final project will collect that, with those numbers to anything else, okay? That's a good hint. You always have that. So what I'd like you to do... Okay, and have these here. is the cake and download all of them. qualify us like this. You get downloaded, okay? I think it says... They should all come up. Take yourself a minute.'s just time for. Yeah, I love all materials. Okay, I'm on the wall. Okay. So there's 100% downloaded here. They're all downloading to the computer. What you're gonna do is you're going to take save these styles, okay? Right there. Save them to your stick. Okay? Because that's, if you save your stick, you've got them there. You know, really? You want to go back and check on them, payfully and impartial it, we'll find it on the stick. So they'll be on the stick, and... You'll say these to the stick, and then you bring them up as you need them. So let me just point out what this is going to look like for you. All right, those are the files that you're gonna save, okay? And use. I'll show you the difference here. I love the instructions. There's the instructions, okay? Files are all... and protected, because they use a lot of business. enabled this here. And you'll go down and get the answers, you have to do with the spreadsheet, right? in... normally, you don h Creator project, accepted in the beginning. If you want to informat the main, uh, Thai run, and then, to apply the heading, so on, you know, so they're giving you, can you give you some hits in the beginning? Okay? Once you go through the space. Okay? And like I said, if you don't finish it, then we don't get finished in class, we want to be able to, uh, save it. I'm your stick, and then you go back. Because if you submitted the piercing, you're gonna get a rate. So you can see it 3 times. Right? When you get the grade, it's gonna tell you what you got wrong. There may be a sheet there, and over the 1st time here, you'll see how it looks. She got a sheet with all the questions, and then there's a little red teepee, like... If the question is wrong, even if it's partially wrong, if there's, like, four or five sections to it, you've got three and right, two and one. It's gonna say it's wrong. And it'll tell you where you made the ears. So you kind of jock that down because of your memory. Then go back to your stick. Make the corrections there. Well, for all the errors you have, you make the proper corrections, you rain go from here to there. Okay, that's good. So you have three attempts to do that, but you don't want to save it every time you make one collection. Hey, don't reason that, but... Can you use it as when you get out? Come in, okay? All right, so that's the greater project. Um, and, uh, I guess, it was too sick. On the stick. You can sit out here in a second. On the stick, are also some other... a sinus. It's stick. This has fact requirements. Practice where she's, this is where I want you to put the, um, over... Actually, you will actually lay around, you'll always have an availability. All right? Templates here. These are some things we're gonna be doing outside of piercing. Okay? Your class 2, and I use this for both my glasses all the time. all right? This is very successful. So it was cautioning, if you were going to do it. These other things match up, look out what I would hear, you. You're going to find your names into these temples, okay? So that's what's important is the right class. Yeah, does D look up the tempo? That's, you know, what about a vertical fashion, okay? So we have that. Graphic templates. when we get into doing graphs, okay? We have 5 graphs of them made up, okay?

Under that temple frame. right? So those are things that we use. All right, and ice, okay? Anybody know what I sold? Any? In case it emerges. Great. Think a nice. It says name, address, phone number, cell phone, or anything like that. And shows my class. Okay? You make it, when I make up the stick for you, you know, the first thing you want to do is go to the ice file, do all that information. For instance, if you leave the stick in class, or even someplace else, okay? Hopefully we'll be able to identify it. A lot of times, you people will probably find sticks in class for my 1st class. And they'll come in, oh, Mr. Robin, just stick here. Okay, I'll throw it on the computer. I said, okay. And so and so. If I can catch them quick enough, I can usually catch them before they get to the parking lot. Okay? You don't want to lose your stick. That's everything you have, okay? So that's one of the 1st files you want to fill out. Okay? It's important to put your cell phone on there, because posting your cell phone on it, all right? Okay, so that's satisfied, right? Okay. So, how many have you brought sticks in? Okay, let's get those made up. here. Okay, I need to give to this. These are all the files that are on the wall. Um... So, okay... Can I follow them? Copy?6. Check. Check. What do you use, Dad? Okay, have other things that you stick to these files, that you mix up, right? Yeah? Oh, okay. Yeah. Okay. Okay. Anyone else? See here. Okay, anybody else? Make sure Um... Call me. talking. It's T A U L A N E. Hi, uh... How was that? How are we done? How? How good. All right. First? Here. Here. Giant panel? here. Okay. Um, Miguel? Miguel here? Wait. right here. Oh, right here, okay, you can do it. Johnny? You? Samantha? Michael? Hmm? Yes, I see, yes. Here. It's what day long. Is it Michelle or what? Michaela. Oh, Michaela. Okay. Giovond? Hey. Oh, man. Ivani Gonzalez? Okay. Q. I found that very interesting when I saw the Kennedy. Q, first name Q. What have you... Last name, Gray? No. Uh, the energy bomb, right? No, okay? Alexis? Here. Thank you. Armando? Here. Uh, Nadine? Here. Uh, Kylie? Here. John, there. Jonathan. John? Last name's H Lar? Right?? Yeah, okay. Anthony? Is he talking? L.J. Taurus. You got a hand? And, uh... Money wise? Come on. What? I'm really into Italian. All right, who did that ball?aging Oh. Two grace up here. And the other one is Hampley Tarson. So I called everybody, right? I didn't answer that. I was like, Okay. So Friday? Oh, post it up. On the stick. If you don't have the stick, that's fine. Okay? I'm gonna give you your first assignment. I hear you stick. Those are made to stick for. Um, we have homework assignments, okay? Maybe the first one. You don't need to stick to do this, okay? You can, the homework assignment is this. You're gonna log onto the Microsoft Office Suite, which contains word and a whole bunch of other stuff. All right? And you're gonna go to PowerPoint. Does anybody hearing that know how to use PowerPoint? So graphic programs, you probably use it in high school, and a lot of people use a little time. But the 1st assignment is, you're gonna go to the PowerPoint, and you're gonna find a... PowerPoint. You make a blind slide. Okay, and you look, it says, you have different sides here, you have, all right? So, you slide, and you're gonna be looking at something that looks like this, either the comparison one. Okay, who are the picture with a cache and I don't care, which would only be 2 people. I use this one here. Okay? I watch them on the right hand side, take a selfie and stuff. Okay? And I know what you look like. Right? Shit yourself. right inside. On the left hand side, you're going to type in your name. I do. And then you're gonna tell me in a short paragraph or two, something about you. So I know I can, I can know you guys a little bit, okay? For instance, the last class I went with, one of the students, she's on the track team. Okay? So, tell me something about you, kid. You know, how many of you may have been born in the other countries? Anyone here? Oh, okay. So we're moving on? Jamaican, okay. Okay, so you can tell

me, you were from the Dominican Republic. Okay. But you came to the United States, you live with this act, that how many people in my family, they're in the background of it, not just a little bit. So I get to know you a little bit. And I want these to be printed out, printed out, so you put, put in my booklet here. So when I get to know you, I can crawl on you and everything else. I find that very interesting. You play sports in high school or in college, you go on a team. Which, what's your major interest in college here? How many of your finance agents? Okay, yeah, because a lot of finance made you take this course. Okay? Anybody here nursing? No? So tell me a little bit about you. I got left hand side. Print it out, and submit it to me. Our next class, okay? It doesn't have to be in color or anything else. Some of you have access to color printers, but there are color printers, and they're black and white printers in campus. What do you need? Is your hootlu card, swipe, and print it out. Okay? You know what that is now? So I'd like to have that on Friday. I get to know you a little better, and I had one young lady one time. She was one of 12 children in the family. A lot of kids. That's a jolly, Dolly Parton was one and 12. This young rose, the youngest of the 12 people in the family. The oldest person was old enough to almost be your mother. Okay? This helps spread out his family was finding out some very interesting facts about you guys, okay? All right? So, we're ready about the bewitching hour. You can leave by that door, but you can't come in by that door. Try to get here on time for the glass. Okay? It's funny enough, I have a... Uh, Asian habits, uh, if we can get out and put you like... It's targets, you know, with the social worker, or even looking. Well, if you, uh, USD stuff, okay? I would say, I know the bookstores sell on the here. So I emailed you, we just tried to order 4 minutes.? Oh. When people know the best guys or staples, Target is... What, is the USB stick? USB stick, yeah. You want to make sure... Okay, something like this. any smaller ones, and somebody had it in the basket on each hand. That's a size you need to do some computers. It's a standard size. Okay. All right. Now you can show off. Oh. Could call you back in the kitchen? It's in there before they're probably busy. Just give it a try. Thank you.
